Independence Naming Scheme

See: <http://mediawiki.saintjoe.edu/wiki/index.php/Instructions:Naming>

- Separate by dashes
 - Section Initials
 - Row Number
 - Gravestone Number
- Ex: South West of East Section Row 3 Grave 4 (ESW-3-4)
- Extra Graves are able to be added between existing graves
- Naming Scheme is Optional
- For this scheme and the methods used in this system, on zenphoto each row has its own album and each grave has only primary picture

ZenPhoto

Our system: <http://mediawiki.saintjoe.edu/zenphoto/>

Zenphoto homepage: <http://www.zenphoto.org/>

- Why?
 - Open Source
 - Separate Photos
 - Mediawiki Extension
 - Tagging

Our Changes

- Skin
 - Inscription
 - Custom Data
 - Tagging
- Tim will now show uploading to ZenPhoto and how tags transfer to Flickr

Roles/Primary Functions

ZenPhoto Extension:

- Two ways to use
 - First, as above displays whole row
 - Second, displays only one picture and is manually given text
 - **EX:**`<zenphoto>s-1|s-1-1.jpg|100px|text=COMER, Silas, son of W & F Comer died 7-26-1853|link=S-1-1</zenphoto>`
